

ICD-10: What We Have Learned & What We Need to Know

Online Webinar
Wednesday, February 17, 2016
12:00 - 1:00 p.m.
\$50 MSMS & MMBA Members
\$75 Non-Members

With far-reaching tentacles that touch every area in healthcare, the mammoth ICD-10 undertaking has even the most prepared organization (both physician and hospital) facing uncertainty as we wait for the dust to settle. This webinar will address the biggest obstacles that have arisen such as:

1. The seventh character and what is the correct one to assign. Is the care aftercare or is the patient still receiving care in the acute stage or the injury?
2. What is the best order of the ICD-10 codes assigned to the encounter
3. The increased specificity as related to the body parts means you need to be well versed in anatomy or you won't be selecting the proper code.
4. Denials for something that you previously got paid for under ICD-9. Have you received the new LCD policies and the revised policies published January 4th by CMS?
5. Biggest hiccups that are out from third party payers.
