

**RESOLUTION 33-07A**

**Title: Lead Levels in Pregnant Women**  
**Introduced by: Domenic R. Federico, MD, for the Kent County Delegation**  
**Original Author: Robert C. Richard, MD**  
**Referred to: Reference Committee D**  
**House Action: Disapproved**

---

**Whereas, elevated lead levels are associated with mental retardation in children, and**

**Whereas, women, especially in lower socioeconomic classes, may also have elevated lead levels, and**

**Whereas, elevated lead levels may have an adverse effect on the unborn fetus; therefore be it**

**RESOLVED: That the Michigan Delegation to the AMA ask the AMA to recommend to the American College of Obstetricians and Gynecologists (ACOG) that lead levels be considered in prenatal profile studies.**
