Title: Pharmacy Benefit Managers and Compounded Medications

Introduced by: Domenic Federico, MD, for the Kent County Delegation

Original Author: David E. Hammond, MD

Referred to: Reference Committee A

House Action: **REFER**

Whereas, compounding pharmacies tailor and customize prescriptions in order to meet patients’ needs for medications that are not commercially available, and

Whereas, many of these patients have problems with mass-produced medications including allergic reactions, inability to swallow pills, or a need for a different dosage or formulation than is available on the commercial market, and

Whereas, compounding pharmacies must have federal certification as a result of the Drug Quality and Security Act enacted in 2013, and

Whereas, compliance with this Act by compounding pharmacies requires acceptable manufacturing practices, proper labeling including directions for use, inspections of these pharmacies by the U.S. Food and Drug Administration (FDA) on a regular basis, and FDA approval prior to marketing compounding medications, and

Whereas, pharmacy benefit managers (PBMs) are hired by employers to manage their employee prescription drug coverage, and

Whereas, PBMs control the drug benefits of 210 million Americans of which 28 million are Medicare Part D patients, and

Whereas, the four largest PBMs in the U.S. are Express Scripts, CVS Caremark, Optum Rx (owned by United Healthcare), and Prime Therapeutics, and

Whereas, at the heart of the conflict between PBMs and compounding pharmacies is the fact that PBMs have used their position and power as health plan administrators to boycott compounding pharmacies by eliminating coverage for compounding ingredients, cutting off health network access, and devising various “gate keeper tactics” using unreasonable administrative mandates designed to deny prescriptions from being filled, and

Whereas, their intent is to cause a significant decline and potential elimination of independent compounding pharmacies from the health plan market, and

46 Whereas, PBMs have a conflict of interest in their gatekeeper role as they own a
47 financial stake in a mail order business that competes with compounding pharmacies that use
48 the U.S. Postal Service, UPS, and other delivery systems; thereby, representing a violation of
49 Sherman Act anti-trust laws, and

50

51 Whereas, PBMs maintain that spending on compound medications has increased
52 exponentially, and

53

54 Whereas, their solution to address these rising costs is to target and block thousands of
55 ingredients used by compounding pharmacies that they claim are greatly inflated but provide
56 no added clinical benefit, and

57

58 Whereas, one needs to question whether PBMs are qualified to evaluate clinical benefit
59 or is it just part of their financial agenda in the \$270 billion drug market, and

60

61 Whereas, PBMs have sent letters to patients and pharmacies containing inaccurate and
62 misleading information about the safety and efficacy of compound medications. These letters
63 to patients inform them there has been an unspecified change in their compound medication
64 benefit plan although PBMs lack the authority to alter the terms of patient health care plans.
65 These documents serve to cover up the financially driven scheme of PBMs to cut their
66 compound spending by 95 percent, and

67

68 Whereas, this scheme has resulted in denial of care to thousands of patients as PBMs
69 continue to issue unlawful blanket denials of compounded medications, and

70

71 Whereas, PBMs have engaged in retroactive audits of compounding pharmacies to claim
72 back reimbursements for compounded scripts already filled citing the lack of FDA approval of
73 the medications, and

74

75 Whereas, they have removed compounding pharmacies from provider networks by
76 terminating agreements without just cause and often without knowledge of these
77 compounding pharmacies, and

78

79 Whereas, PBMs have also threatened some physicians with accusations of fraud or
80 abuse if they prescribe compounded medications, and

81

82 Whereas, as a result of their anti-competitive conduct, PBMs have continued to “line
83 their pockets” financially at the expense of the most vulnerable patients in America; therefore
84 be it

85

86 RESOLVED: That Michigan Delegation to the American Medical Association (AMA) ask
87 our AMA to support federal regulation, consistent with existing anti-trust laws, that require
88 pharmacy benefit managers to establish drug reimbursement plans for compounded
89 medication based on medical need rather than financial concerns.
